

## **HomePLUS Package (VDSL Technology)**

Speed		AIS Playbox	VDSL
Download (Mbps)	Upload (Mbps)		HomePLUS (Baht/month)
30	10	YES	690
50	10	YES	877
75	10	YES	988

1. HomePLUS Package registered as residential only.
2. Service Fee is exclusive of 7% VAT.
3. Service Fee collected as charge in advance starting on the first date of bill cycle Special package for SUPER Hi-Speed Broadband available to broadband users only eligible for 12 months and would be changed to the normal price.
4. The customer get discount for installation fee with outdoor wiring installation amount of 4,800 Baht when agree to use AIS Fibre service continuously at least 12 bill cycles since the date of the installation. In case that the customer cancels the service within 12 bill cycles from the date of installation, the company reserves the right to collect the installation fee with outdoor wiring installation at the rate based on prorata basic of remaining bills under such period after deduct from paid bills.
5. If the customer chooses to pay for the installation fee with outdoor wiring installation in amount of 4,800 Baht since the first bill cycle will not determine the period of AIS Fibre service.
6. All AIS Fibre equipment including AIS Playbox are belonging to AWN. In case customer cancels the service, customer must return all AIS Fibre equipment to the company.
7. FREE AIS PLAYBOX activation fee 2,500 baht for normal packages only.
8. New AIS Fibre subscribers has permission to borrow Dual Band Wi-Fi Router that support 2.4 GHz and 5 GHz frequency increase efficiency improvements for any packages
9. The customer who subscribe HomePLUS package receive free Private IPv4 with DDNS\* and Public IPv6. Can use port forwarding and bridge mode.
10. AIS customer will receive special discount on the monthly fee of AIS Fibre by AIS Prepaid customer who have monthly usage at least 300 baht per month.
11. Package 50/10 Mbps at 699 baht for AIS Serenade (Emerald, Gold, Platinum) for the customer who remain Serenade segment.
13. Speed Boost for HomePLUS Package with uploads is equal download based on customer packages for Facebook and YouTube (Speed Boost for condominium will have a maximum upload 30 Mbps depending on the cable line of the building)
14. The customer cannot change the package less (Speed) until the end of the contract 12 months.
15. If services are suspended due to credit limit or unpaid bills. Services included in the package are all suspended. When payment service fee (payment channel) under the condition, the customer can use various services as normally.
16. The Company reserves the right to alter specifications without prior notice. For more information [www.ais.co.th/fibre/package](http://www.ais.co.th/fibre/package)

## **Millennium Residence Pure Fiber to the Room Package (Apply at TBG)**

**Effective date 1/6/2017**

Speed		AIS Playbox	Pure Fiber to the room (Baht/month)
Download (Mbps)	Upload (Mbps)		
100	40	YES	1,590
200	80	YES	2,590

1. HomePLUS Package registered as residential and business.
2. Service Fee is exclusive of 7% VAT.
3. Service Fee collected as charge in advance starting on the first date of bill cycle Special package for SUPER Hi-Speed Broadband available to broadband users only eligible for 12 months and would be changed to the normal price.
4. The customer get discount for installation fee with **outdoor** wiring installation amount of 4,800 Baht when agree to use AIS Fibre service continuously at least 12 bill cycles since the date of the installation. In case that the customer cancels the service within 12 bill cycles from the date of installation, the company reserves the right to collect the installation fee with outdoor wiring installation at the rate based on prorated basic of remaining bills under such period after deduct from paid bills.
5. The customer has to invest installation **indoor** fiber optic from the room to AIS fiber system. Please contact TBG for installation.
6. All AIS Fibre equipment including AIS Playbox are belonging to AWN. In case customer cancels the service, customer must return all AIS Fibre equipment to the company.
7. FREE AIS PLAYBOX activation fee 2,500 baht for normal packages only.
8. New AIS Fibre subscribers has permission to borrow Dual Band Wi-Fi Router that support 2.4 GHz and 5 GHz frequency increase efficiency improvements for any packages
9. The customer who subscribe Millennium Residence Pure Fiber to the Room Package receive free Private IPv4 with DDNS\* and Public IPv6. Can use port forwarding and bridge mode.
10. The customer cannot change the package less (Speed) until the end of the contract 12 months.
11. If services are suspended due to credit limit or unpaid bills. Services included in the package are all suspended. When payment service fee (payment channel) under the condition, the customer can use various services as normally.
12. For existing AIS Fibre (Pure Fiber to the room) internet speed will be up speed within July 2017.
13. The Company reserves the right to alter specifications without prior notice. For more information [www.ais.co.th/fibre/package](http://www.ais.co.th/fibre/package)

## **VDSL VS Pure Fiber**

### **VDSL**

Very-high-bitrate Digital Subscriber Line service is closer to cable Internet in speed and behavior than ADSL. It can be up to five times faster for downloads and ten times faster for uploads. Maximum upload speeds hover around 60 Mbps if you live close to the provider, and the signal is just as strong upstream as it is downstream. VDSL accomplishes this with more efficient use of phone lines achieved through a configuration that effectively shortens the distance that the signal has to travel. Shorter distances means less degradation and a more reliable connection. A higher amount of available bandwidth delivers better overall performance than ADSL can offer. However, distance and wire condition can still affect VDSL.

### **UFB/Fibre**

Ultra-Fast Broadband (UFB), also known as fibre Internet, is popping up in many places and drawing attention with its promise of the potential for as much as 1 Gbps for both uploads and downloads. Although speeds around 300 Mbps are more common, UFB still has a lot of potential for households and businesses that require superior Internet performance. UFB bypasses phone lines and uses smaller, lighter fiber optic cables with glass conductors. These conductors transmit light signals rather than electricity, so they aren't subject to interference from electrical wires or damage from lightning strikes. This results in one of the clearest, most consistent broadband connections you can get, but the cost of installing these cables means that you'll pay more for the experience. Those living in rural areas may not have access to UFB at all. If you can find a provider in your area, however, the speed and reliability of a fibre connection makes it perfect for users that transmit high amounts of data, especially digital media, on a regular basis. Unlike DSL connections, you get the same level of performance regardless of location.
